**DETAILED ACTION**

Receipt of applicant's amendments and remarks submitted July 7, 2001 is acknowledged.

***Claim Rejections 35 U.S.C. § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 86 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The term "low" in claim 86 is a relative term which renders the claim indefinite. The term "low" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention. The claim is indefinite as to the molecular weight of the branched chain aliphatic acids or alcohols.

4. Applicants' arguments regarding to the rejection submitted July 7, 2001 have been fully considered, but are not persuasive. Particularly, the specification only gives an example of the "low" molecular weight plasticizer oil, not a definition. The example may not be considered as metes and bounds for the "low molecular weight" alcohols.

***Claim Rejections 35 U.S.C. § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1617

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 55-58, 61-79, 82, 85-94 and 97 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al. (U.S. Patent 5,362,497) in view of Wang et al. (U.S. Patent 4,299,828 of record), Copper (U.S. Patent 4,552,872 of record) for reasons set forth in the prior office action. Regarding the amendment of 86, which defines the low molecular weight alcohols as "which reduce the viscosity of the carrier system, note the intended use of a components in a composition, would not render patentable weight to the composition.

7. Applicants' arguments submitted July 7, 2001 have been fully considered, but are not persuasive for reasons discussed below.

8. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., 'a *single phase* mixture or enhancers, an active ingredient and a defined lipid composition *to form a stick*') are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Particularly, the claims do not have limitation regarding the number of phases in the carrier. Further, the claims are directed to a solid composition, not a stick.

9. Applicants' assertion that Cooper et al. teaches away from the claimed invention is not persuasive. Cooper et al. teaches the usefulness of unsaturated alcohols or acids in dermatology composition. A person of ordinary skill in the art would have been motivated to employ unsaturated fatty alcohols or acids in a dermatological composition. The limited usage of some

Art Unit: 1617

particular hydrocarbon, such as saturated fatty acid or alcohols, in Cooper's particular penetration-enhancing composition is due to the interfering with the penetration enhancing. Yamaha et al. teaches that employment of such acid and alcohol is not an issue in their composition.

10. Nothing unobvious is seen in the claimed invention.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
